

## MIROS SIDEBOARD

Miros Sideboard is inspired by the creation, the birth of the universe itself, cradeled within the aluminium vessel lies a representation of what we know as life; womb like, soft, comfortable, inviting, yet misterious and unkown - suade.

It invites the user to feffect about the meaning of life, how we see ourselves (our own reflection), and what we choose to nurture inside our lives.

This collection is the oximoronic intertwining marriage between the awe-inspiring brutalist architecture and post modernist design wave of the 70s.
